

RX6, RX9 & RX12

Commercial roof fans

RX models are a neat way of ventilating through glazed and solid roofs and can be used vertically in windows on exposed sites such as coastal areas and high rise buildings. They are suitable for single and sealed double-glazed windows and panels up to 25mm. For flat roofs an optional roof-mounting plate allows RX models to be fitted to dressed curbs.

On RX9 and RX12 units a positive plug and socket assembly provides a means of isolation for service access without the safety risk of accidental disconnection. These two models feature totally enclosed external rotor motors providing constant volume outputs, even in gusty external conditions.

Product Features	RX6	RX9	RX12
Reference Number	90818AW	90424AW	90425AW
