

Juneau

Optimyst®

The Juneau is an electric inset fireplace unit, ready to be installed into nearly any interior space or indoor object, including inactive gas or wood fireplaces. The three-dimensional Optimyst® fire image comes from cold water vapor and light, which is startlingly realistic, can be seen from all sides, and is safe to touch. A practical detail: the water reservoir can be refilled from the front, without removing its glowing log set. In a few words: the Juneau is a perfect basis for great fireplace projects. Available in two sizes.

USP's Juneau

- Suitable for installation projects and designed to fit into a custom-made frame or fireplace
- Easy-fill water tank, offers around 8-10 hours of continuous operation before refilling is required
- The water tank is very easy accessible through a drawer in the front
- View of the fire from 4 sides
- Log set included
